E-Receipts and Receipt Store: These receipt capabilities move you towards paper-less receipts

A) Activate ‘E-Receipts’

• Activate “e-Receipts” within your user profile

B) Activate your ‘Receipt Store’

• From your home page, select Expense tab > View Receipt Store

  1: Get verified: Enter your email and click submit. Check your email for the Concur receipt store verification code and enter in this section of the application. You will now be able to see 2: Emailed receipts to your Receipt Store and 3: Attach the receipt to your expense report.
E-Receipts versus Receipt Store

What is the difference between the two receipt handlers?

E-Receipts

The e-receipt data is used by the Smart Expenses functionality to intelligently match possible duplicate transactions. The differences between e-receipts and Smart Expenses are listed below:

• **E-Receipt:** The term e-receipts refers to data sent to Concur through the Concur Connect Program. This data comes directly from the supplier and provides the user with a complete receipt image linked to their expense item.

• **Smart Expenses:** Smart Expenses are expenses where there is a match between two or more data points (manual entry, credit card, travel itinerary, and e-receipt). The best match is between credit card data, travel data, and e-receipt, but a match between credit card and manual entry would also qualify. If an e-receipt matches any data point, the user will be presented with the Smart Expenses screen to verify the match.

Receipt Store

• Assumes - you have not booked the vendor via Online Booking or Conlin Travel agent

• You must email your photo or scanned receipt to one of your ‘verified’ email addresses

• The fact that you verified your email within the receipt store, enables the receipt store to gather that receipt into the ‘Receipt Store’ holding area

• When creating your expense report, you simply find and link the proper receipt located in your Receipt Store to the expense report line item
WSU Travel Card
Minimizes expense line item entry by approximately **70%**

Benefits:
- No expense line item entry needed for travel card charges; they are auto-populated
- Travel card eliminates personal cash flow

Auto-populate expense report entries
WSU travel card charges

- Travel charges posted to the WSU travel card are automatically placed into a credit card holding area within the Concur expense solution
- Traveler (or delegate) are able to import the travel card charges into the new expense report which eliminates the basic expense line item entries
- Most transactions are fully populated; some transactions require identifying an expense category to map the charge to the proper category

Cash flow management

- Travelers that use the WSU travel card are not required to pay JP Morgan Chase for “approved” travel charges; which eases the cash flow burden on the traveler
- Only transactions noted as “personal” are required to be paid by the traveler to JP Morgan Chase
